Webflow

## Internship Experience - *Software Engineer Intern - Heterophyllus Technologies, Pondicherry*

Jan-Jun 25

- Designed, developed, and deployed front-end components using HTML, CSS, JavaScript, ReactJS, and Figma designs.
- Converted Figma prototypes into responsive, interactive web interfaces for both mobile and desktop.
- Collaborated remotely with clients via phone calls to identify and resolve bugs and issues in the application.
- Developed the **IPEYU** web application and contributed to real-time project development.

## Projects **EHE** – Event Management System *Real Time Web Application – “The state of being married”*

- Developed a scalable, real-time event management platform tailored for seamless wedding planning and coordination.
- Designed a clean, responsive user interface supporting multi-role interactions between event **organizers**, **vendors**, and **guests**.
- Implemented live notifications, task scheduling, and guest engagement features to enhance collaboration and operational efficiency.
- Inspired by the German term “**EHE**” meaning “**the state of being married**,” the app consolidates wedding services under one digital platform, streamlining the planning experience without functioning as a matrimonial portal.

## Certifications

1. **Infosys** Springboard (Tech Training)
3. **Accenture** (Virtual Experience Program)

2. **Great Learning** (Front-End Web Development)
4. **Walmart** Global Tech – Mapathon & Sparkathon
